Art Unit: 1743

1. The amendment filed 02/14/00 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: newly added Figures 6A and 6B, and the brief description of the new figures. Although the last office action indicated that the drawings failed to show the features of the claimed apparatus, Applicant is reminded that any new figures added after the filing date of the application must be limited to any structure which is specifically described in the specification, as originally filed.

Applicant is required to cancel the new matter in the reply to this Office Action.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1743

4. Claims 30-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hafr (1989) in view of Mackay (EP 0266881).

The reasons for this rejection are as set forth in paragraph 5 of the last Office action. Regarding the newly recited limitation of the reaction vessels being sealed, one of ordinary skill would have recognized the advantages of performing the analysis in the apparatus of the prior art utilizing sealed reaction vessels in order to prevent contamination as well as optical cross-talk. It was notoriously well known in the field of optical analysis for form sample containers, or a wall surface thereof, from an optically transparent material for this very purpose.

5. Applicant's arguments filed 02/14/00 have been fully considered but they are not persuasive. Applicant's arguments regarding the newly recited limitation of sealed reaction vessels is addressed above. Applicant's arguments regarding the particular timing or sequence of fluorescence detection are not persuasive as they are directed solely to the intended use of the apparatus, rather than the structural features thereof.

6. Claims 30-47 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-6, 8-10 and 12-27 of copending Application No. 08/266061. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Art Unit: 1743

See paragraph 3 of the last Office action. Regarding the newly recited limitation of a sealed reaction vessel, such would have been obvious for the same reasons applied in the grounds of rejection, above.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
